Subject: PG&E and EVs

Hi Tom-

Good to see you today after the meeting. I'm writing to introduce Redacted a MPA student at UC's Goldman School. Alejandra is doing her Applied Policy Analysis project (basically a masters thesis) on the future business model for utilities and regulatory framework for PUCs in the context of increased distributed resources and specifically increased deployment of EVs. Dan Adler and I are the clients for her project. She's already spoken with Redacted but I think it would also be helpful for her to talk with you and others who have a broader perspective and perhaps more history as well. I'm sending her your way with the hope that you can help her set up some meetings in the next few weeks. I'm excited about this project and looking forward to hearing her ideas about how ZEVs can be an integral part of the utility of the future, as well as what regulators have to do to facilitate the transformation.

Thanks,

Nancy
