Subject: Meeting with RENs and IOUs on EUC single family Enhanced "Flex/"Basic" program design
When: Monday, March 04, 2013 3:00 PM-5:00 PM (UTC-08:00) Pacific Time (US & Canada).

Where: Golden Gate Room

All,

I changed the venue of the meeting to the Golden Gate room at the CPUC because it seems like we will need the extra room, also I heard that there was some confusion over whether the meeting would be in-person or a conference call, I wanted to clarify that it will be both, we expect that some people will be in-person and others would call in.

Sorry for some reason my computer stalled and the invite was sent out before I could write my note and our Outlook was later down, being worked on until 6:30pm. To clarify the point of the meeting is for the RENs to present to us their responses to Energy Division's requests for follow-up information on their EUC single family program design, which I attached and generally why they believe the 1 of 3 approach for base measures (duct sealing, attic insulation and whole house sealing three base measures for IOUs and RENs) is the superior design. I would also expect that the IOUs could also do a presentation on the merits and the reasoning behind their program design, especially where they have disagreement with the RENs on certain programmatic issues. I would also add that I think that the presentations should be high level in the beginning, because there probably varying levels of familiarity among participants on the specifics of the newly redesigned RENs "Flex" and IOUs "Basic" path offering for Energy Upgrade California. If anyone else has suggestions for additional topics I would welcome that as well.

I will work with both the IOUs and RENs to formalize an agenda hopefully early next week. The call in number for this meeting is Redacted and the passcode is Redacted

Thanks,

Nils
