Subject: RE: Agenda for Meeting w/Commissioner Peterman on March 12

I spoke too soon. Commissioner Peterman just gave me some feedback on the day's plan. She suggests dropping the gas meeting altogether and doing it separately later. She also reminded me that she did a full day with PG&E about a year ago and so she's already done some of the tours and some of the discussion may be redundant.

She is particularly interested in hearing about distribution system planning and spending, including smart grid. She suggests dropping one of the tours, perhaps the transmission operations center tour, or possibly the "customer care" overview portion. I am not sure if maybe some of the customer care discussion might be focused on distribution, hard to tell.

In any case, is it possible to accommodate these preferences? Thanks.

Julie

Hi Meredith,

I haven't gotten any feedback from any others in the office on this, so I think we are good to go on it. The one thing to know: Commissioner Peterman and Jen Kalafut (another advisor) have to fly out to a meeting in SoCal that evening, so it's possible we may need to compress some time in the afternoon. It looks like the gas matters are last, and I know we may want to go out to San Ramon and do more intensive orientation on gas issues later in the Spring, so if we can maybe cut one short, that might be the one for this particular session. How does that sound? I am not aware of any specific issues on procurement, though Comr Peterman of course is very interested in the renewables end of things.

Thanks.

Julie

This time with the attachment. One of those days...

I'm really sorry about sending to the wrong address.

Julie,

Attached is the agenda for the meeting on March 12. As I mentioned in my message, please let me know if there are any issues that Commissioner Peterman would like to cover and I will make sure that we have the right people in the room to address, particularly on the discussion with John Conway who leads our Energy Supply organization.

Hope you are doing well.

Thanks,

Meredith
