Subject: Re: LLNL Meeting

We can address your question at the workshop. See you tomorrow!

Thanks, Erik.

I plan to attend, unless the baby decides to arrive early.

My initial question is how "1.4 Ensemble Weather Forecasting for Wind and Solar Generation" builds upon some CEC/LLNL work that was presented to the CPUC late last year about integrating DR and Storage. I haven't looked at the slide deck fully, so maybe it's discussed in there or it'll come up on Wednesday.

Audrey,

Attached is the draft workshop presentation document. It includes the agenda. It will undergo some further editing tomorrow, but is close to what we will use on Wednesday. I'm also including an Excel file which summarizes the overall portfolio. Finally, I've attached a list of Board members with some biographical information. These are the documents we discussed last week.

Will you be able to attend the workshop? Let me know if you need any additional information or have comments on the short list of research project proposals.

Best regards,

Erik

Hi Erik,

Would you mind sending me the agenda and other documents we discussed in the meeting last week? Sorry I couldn't join you in person for the meeting.

Thanks,

Audrey
