Subject: Thank you for your participation in the Foundation for the Future Energy Meeting

Thank you all very much for participating in the Feb. 27 meeting on "A Foundation for the Future of California's Electric Power System". Secretary Shultz was pleased with the discussion and the willingness to talk candidly about the challenging issues facing California's energy system transformation in terms of coordination, climate change, cost, and reliability.

And thank you to those who have sent us followup ideas and thoughts. We welcome any additional thoughts. We are digesting the various followup items that have been identified and will be back in touch. Once again, thank you very much.

Sincerely,

Dian Grueneich
