[Redacted]

We will be able to provide the responses by April 5. A couple of the items I will need to follow up on to make sure that we have the information. I will check on those items this afternoon and let you know.

Best regards,
Meredith

Ms Allen and [Redacted]

As you may or may not be aware the Safety and Enforcement Division gives a safety briefing at each Commission meeting. The Electric Safety and Reliability Division has been scheduled to present on April 18th covering the NERC alert and the status of the IOUs in California. I would like to request the below information be provided by April 5th if possible to be included in the presentation:

1. Surveys:
 - a. When did you start to survey your Transmission Lines for Clearance Issues
 - b. Are the Surveys complete
 - i. If yes when did your company complete the surveys
 - c. Are you using only LiDAR to do the Survey

- i. If not, what other methods is your company using
- d. Are you only survey lines subject to NERC
 - i. If no, please what additional lines your company is surveying
- 2. Findings:
 - a. How many findings/issues has your company found
 - b. How many of the findings/issues were in violation of a General Order 95 Rule, without adjusting the transmission line for temperature
 - c. How many issues/findings has your company corrected so far?
 - d. What is the methodology that your company is using to correct the issues/findings?
 - e. Please provide a simple list of what has caused the clearance issues (i.e higher rating of lines, foreign objects, etc...)
 - f. When does your company expect to correct all the issues/findings?
 - g. Has your company had to file any advice letters under GO 131-D to correct one or more of the issues?
 - i. If yes, please provide the list of the letter and the current status?

Please feel free to call me if you have any questions or comments. Thank you for your time and attention.

Sincerely,

Redacted
