Subject: Safety |Symposium 7-8 May 2013

Ken,

As we discussed last night, I am the Director of the Safety and Enforcement Division of the California Public Utilities Commission. I was brought in after the San Bruno pipeline explosion which killed 8 people in 2011. My mission is the change the culture of the PUC and the utility industries we regulate to embrace safety as toll and an enhancement to accomplish our missions.

As part of their culture change, Pacific Gas and Electric and the CPUC are sponsoring the first in a series of Safety Symposiums 7-8 May 2013, “Forging a New Vision of Safety in California”. The audience will the 5 commissioners, their key staff, the directors of the PUC, and the presidents, CEO’s and the members of the Board of Directors of the 4 major Gas companies in California. The symposium will consist of 3 panels. |The first will at 1300 on the 7th and be about Climate and Culture of Safety, the 2nd the following morning is “lead or regulate” and the 3rd is “Effectively managing a disaster.”

I would like to invite you to participate along with Capt. Bridges, a Senior Executive from Alaskan Air, and Mr. Paul Levy former PUC commissioner from Mass and a SME on culture change.

P|G&E will be arranging all your travel and per diem. Please let me know if you are interested and if this works in your schedule.

Semper Fi,

BG H
