Subject: RE: Memo3-22-13MEAAccessstoCustomerDataWithoutCustomerConsent.docx

Eric,

Thanks for the quick response. It is great to hear that we are in agreement regarding there being no legal barriers to receiving the interval usage data. It sounds like we will be able to have a productive discussion tomorrow regarding the best method for us to receive this data on a regular, current basis. We understand that PG&E does not wish to build a system for MEA to receive this data. However, as MEA is legally entitled to receive this data and there is a funding stream already in place for PG&E to provide services to CCAs, it is really just not acceptable for MEA to continue to be denied this data.

On the Second issue referenced below, we agree that is not the focus of the meeting tomorrow. However, the memo that was circulated by PG&E was not responsive to MEA's comments on D. 12-08-045, the privacy proceeding. Given MEA's requirement to comply with D. 12-08-045, is it unclear why PG&E continues to express concerns about transmitting EE data. If your team could respond to this issue directly it would enable all parties to determine next steps.

Thank you,

Dawn

Subject: RE: Memo3-22-13MEAAccessstoCustomerDataWithoutCustomerConsent.docx

Dawn –

There seem to be two issues here that I think we should separate.

First, there is the question of the interval usage data for CCA customers. We agree that there is no privacy issue for this data, as outlined in the memo that we sent on Friday. We have provided you such data on a historic basis under the CCA-INFO tariff, but you have asked for new ways to get it on a more current basis. As we have mentioned, we do not wish to build one new system for MEA and a separate system for others under the Customer Data Access case. We are happy to discuss how to deliver that data to MEA, which we will discuss with you tomorrow at the meeting with our IT director, John Warnock. I also think it would be very helpful for CPUC staff to hear the issues on the technical side around this type of data.

Second, there is the issue of the EE data sharing involving non-CCA customers, including bundled and gas-only customers. Unless you are seeking near real time interval data, there are not so many technical issues here, but only the privacy issues that both MEA's and PG&E's memos address. I didn't think this was the focus of the meeting tomorrow.

Let me know if you have any questions, thanks-

Sid,

The memo you sent across is not responsive to the issues regarding interval smart meter data for our existing customers, or the issues we raised in our memo regarding D. 12-08-045 (re-attached here). As you know, we have a meeting with your team scheduled for tomorrow to discuss logistics of transferring this interval data to MEA. However, we were informed by Randy Litteneker in an issues meeting yesterday that PG&E may still be planning to wait for additional proceedings to progress before transferring interval meter data to MEA. If this is the case, we are concerned that the meeting tomorrow will not be productive.

Please let us know if your team will be able to begin transferring this data or if we will need to escalate this issue further.

Regards,

Dawn

MEA and CPUC teams --

Sorry for my tardy response on this memo -- it is entirely due to my being on the road all day. In any case, here is the legal memo requested. Please let us know if you have any questions about it.

[Redacted] will be back on Monday and will coordinate with [Redacted] on finishing up scheduling the meeting.

Thanks.

yours,

sid
