Yes, Ditas mentioned this to me and I think we would like to participate. Thanks.

Hi Julie,

Sounds good.

Also, I discussed with Ditas scheduling a tour of Diablo on August 13, which is the week of the CPUC meeting in Monterey. Please let me know if you, Commissioner Peterman or any of the other advisors would like to join. I'm also checking on whether Pres. Peevey's advisors that

have not toured the plant would like to join. The tour starts in the morning and therefore, it is best to stay in the area the night before. There are a couple of hotels nearby that have government rates. We can send you the hotel information.

Thanks,

Meredith

Hi Meredith,

Thanks for this revised plan. I haven't heard back from the Commissioner about the first meeting -- but let's plan as you suggest and I'll let you know if she prefers to bring the other two advisors.

As for the rest of the schedule, I think it's fine. Let's plan to end at 4 and still do a brief discussion of gas with Nick.

Thanks and looking forward to Tuesday.

Julie

Julie,

A few questions regarding next Tuesday:

- When we had these meetings with the other Commissioners, the discussion with Tony and Chris included only the Commissioner. Would Commissioner Peterman like to take the same approach? We could have you and the Commissioner participate in that meeting and then the rest of the staff join at 10.
- The plan for the Customer Care overview is to have the officers very quickly discuss their areas of focus, including EE and DR and spend the majority of time on the Analytics and Research Tool. This data tool is used to find commercial and residential customers that would be interested in EE projects and SmartRate based on demographic and usage information. The tool is cutting edge and could be used in the future for other conservation products. Would Commissioner Peterman be interested in learning about this tool? We can then incorporate Smart Grid and distribution planning in the Electric Ops briefing rather than tour the transmission control center.
- Since Commissioner Peterman met with members of our Energy Supply team

previously, we propose shortening the Energy Supply discussion rather than eliminating the gas briefing. We can also definitely schedule a separate gas briefing, but feel it would be beneficial for Commissioner Peterman to meet Nick Stavropoulos now and then have a more in depth discussion on gas at a later date. This approach would allow us to conclude by 4:00. If that is not early enough, we could skip gas altogether as you suggest and end the day at 3:30. Please let me know what works best.

I have attached a revised agenda that shows the day ending at 3:30 or 4:00 depending on whether the meeting with Nick is included.

Please call me if you would like to discuss – 415-828-5765.

Thank you for the feedback on the agenda. We are looking forward to the meeting.

Meredith

I spoke too soon. Commissioner Peterman just gave me some feedback on the day's plan. She suggests dropping the gas meeting altogether and doing it separately later. She also reminded me that she did a full day with PG&E about a year ago and so she's already done some of the tours and some of the discussion may be redundant.

She is particularly interested in hearing about distribution system planning and spending, including smart grid. She suggests dropping one of the tours, perhaps the transmission operations center tour, or possibly the "customer care" overview portion. I am not sure if

maybe some of the customer care discussion might be focused on distribution, hard to tell.

In any case, is it possible to accommodate these preferences? Thanks.

Julie

Hi Meredith,

I haven't gotten any feedback from any others in the office on this, so I think we are good to go on it. The one thing to know: Commissioner Peterman and Jen Kalafut (another advisor) have to fly out to a meeting in SoCal that evening, so it's possible we may need to compress some time in the afternoon. It looks like the gas matters are last, and I know we may want to go out to San Ramon and do more intensive orientation on gas issues later in the Spring, so if we can maybe cut one short, that might be the one for this particular session. How does that sound? I am not aware of any specific issues on procurement, though Comr Peterman of course is very interested in the renewables end of things.

Thanks.

Julie

Julie,

Attached is the agenda for the meeting on March 12. As I mentioned in my message, please let me know if there are any issues that Commissioner Peterman would like to cover and I will make sure that we have the right people in the room to address, particularly on the discussion with John Conway who leads our Energy Supply organization.

Hope you are doing well.

Thanks,

Meredith
