Great, thank you! We'll take this into consideration. Once we are a little further along in this process, we'll do a conversation to make sure we are all on the same page.

Subject: Our thoughts about BV

Liza

You asked for some information about how we see the scope of the BV work and how we would like to be able to define the working relationship with them. We really appreciate your willingness to consider our perspective.

This one pager summarizes our current thinking. We believe the BV work scope should focus on PSEP construction activities, and we think it would be helpful if SED would clarify that. On this attachment we list some things we believe should be out of scope, and we also list the work products we consider most meaningful for BV to review. Finally we list the high-level protocols we expect to be followed at construction sites.

We'd be very happy to talk more about this, and provide whatever support is helpful to your review.

Thanks again.

Laura
