Subject: inquiry re: PG&E AL 3377-G/4209-E

Greetings Mr. Cherry,

I have a request for further information regarding PG&E's advice letter 3377-G/4209-E; if you would please forward this inquiry to the appropriate contact I would greatly appreciate it:

Please provide a more detailed breakdown of the types of costs that PG&E proposes to incur for its CSI-Thermal local market facilitation activities during July – December 2013. Specifically for each of the “RES,” “SMB” and “LC&I” amounts identified in the “Local Budget (July 1, 2013-Dec. 31, 2013)” table on page 10 of the attached “California Solar Initiative...Six Month Continuation Plan”, identify how much in cost that PG&E expects to incur for each of the types of activity identified in the “Timing” table/timeline directly above the “Local Budget” table on page 10. If a specific dollar amount can not be estimated and provided, please provide a range of the possible cost associated with each activity.

Please don't hesitate to contact me if clarification is needed regarding this request,

thanks & best regards,

Valerie Kao
