Currents is external to PG&E. It is available to the general public. I have copied Sid in case he has any additional information.

We're curious what PG&E does in this situation when CAISO calls a Flex Alert for a specific area in PG&E's territory. Did PG&E reach out to any of its earned media contacts, local government partners or community based organizations in the area to help spread the word that conservation might be needed in Santa Clara today while you work on the substation?
