Subject: RE: Memo3-22-13MEAAccessstoCustomerDataWithoutCustomerConsent.docx

Eric/Sid: I don't have the memo you sent to MEA addressing their request for interval usage data for MEA customers and for electric and gas data for non-MEA customers for EE purposes. I would like to know for each of these why PG&E cannot provide the data per MEA's request.

1. Please provide specific citations to Commission decisions/resolutions where you think an issue is still pending at the Commission and PG&E is awaiting for an order from the Commission.
2. A specific citation/reference to a Commission decision/resolution that the data security audit is required to be performed by PG&E or that the audit is a precondition to MEA getting the data.
3. Did PG&E raise the issue of cost of providing interval meter data and whether and how it was addressed by D. 12-08-045?

Please also provide me a copy of any memo that was sent to MEA on this. I need to nail down these issues this week. Thanks.

Subject: RE: Memo3-22-13MEAAccessstoCustomerDataWithoutCustomerConsent.docx

Dawn –

There seem to be two issues here that I think we should separate.

First, there is the question of the interval usage data for CCA customers. We agree that there is no privacy issue for this data, as outlined in the memo that we sent on Friday. We have provided you such data on a historic basis under the CCA-INFO tariff, but you have asked for new ways to get it on a more current basis. As we have mentioned, we do not wish to build one new system for MEA and a separate system for others under the Customer Data Access case. We are happy to discuss how to deliver that data to MEA, which we will discuss with you tomorrow at the meeting with our IT director, John Warnock. I also think it would be very helpful for CPUC staff to hear the issues on the technical side around this type of data.

Second, there is the issue of the EE data sharing involving non-CCA customers, including bundled and gas-only customers. Unless you are seeking near real time interval data, there are not so many technical issues here, but only the privacy issues that both MEA's and PG&E's memos address. I didn't think this was the focus of the meeting tomorrow.

Let me know if you have any questions, thanks-

Eric

Sid,

The memo you sent across is not responsive to the issues regarding interval smart meter data for our existing customers, or the issues we raised in our memo regarding D. 12-08-045 (re-attached here). As you know, we have a meeting with your team scheduled for tomorrow to discuss logistics of transferring this interval data to MEA. However, we were informed by Randy Litteneker in an issues meeting yesterday that PG&E may still be planning to wait for additional proceedings to progress before transferring interval meter data to MEA. If this is the case, we are concerned that the meeting tomorrow will not be productive.

Please let us know if your team will be able to begin transferring this data or if we will need to escalate this issue further.

Regards,

Dawn

MEA and CPUC teams --

Sorry for my tardy response on this memo -- it is entirely due to my being on the road all day. In any case, here is the legal memo requested. Please let us know if you have any questions about it.

Eric will be back on Monday and will coordinate with Sebastien on finishing up scheduling the meeting.

Thanks.

yours,

sid
