

April 15, 2013

Edward Randolph
Director, Energy Division
California Public Utilities Commission
505 Van Ness Avenue
San Francisco, CA 94102

Subject: 30-Day NEM Report

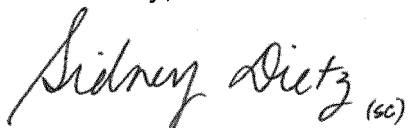

Dear Mr. Randolph:

Effective January 1, 2003, California Public Code (PUC) Section 2827(e)(1) requires that electric service providers notify the Commission prior to processing of a request for establishment of Net Energy Metering (NEM) service for solar or generator if the processing time exceeds thirty (30) working days from the date electric service provider receives the customer's completed application (including signed interconnection agreement and final inspection clearance from the governmental authority with jurisdiction).

In compliance with the PUC Section 2827, PG&E submits the enclosed summary sheets list solar and interconnection projects that meet these criteria for the First Quarter of 2013, from January 1, 2013 to March 31, 2013. To protect customer confidentiality, a Project's ID number is used to identify projects. Also, as per (a) the interconnection has not yet been approved; and (b) the expected completion date.

Unless directed otherwise, PG&E will continue to submit this notice in this format on a quarterly basis.

Sincerely,

Sidney Dietz
Director, Regulatory Relations
