Hi [Redact]

Erik, a Calpine rep, and I met on Wednesday. I informed Eric that reconfiguring the LMEC deal was unlikely to gain Commissioner Florio's support.

As for the bigger picture goal question, here are his thoughts:

"I think the primary policy goal moving forward is to capture additional electric generation from any large gas load that is not achieving dual use of the fuel – which should be both GHG reducing and economical (good luck on the latter, I realize). Thermally matched operations are the best. "

Matt,

I'm following up on the meeting we had last Thursday. You were going to go back to Commissioner Florio and ask some questions:

- Feedback about what policy drivers for CHP (Goals and Objectives from Section 1 of the Settlement), beyond GHG reductions, are most significant.
- Explore the issue of an adjustment to the form of the LMEC deal.

Thanks,

[Redacted]
