Res E-4529: Pacific Gas and Electric Company (PG&E) requests the Commission approve the Confirmation for Resource Adequacy Capacity Product that PG&E has executed with Calpine Energy Services, L.P.

Pursuant to Public Utilities Code Section 311(e), this is the digest of the substantive differences between the proposed resolution of Energy Division (mailed February 28, 2013) and the alternate proposed resolution of President Michael R. Peevey.

- The original resolution approves Pacific Gas and Electric's Confirmation for Resource Adequacy Product which is an Agreement for Combined Heat and Power Resource Adequacy Capacity Product for 280.5 Megawatts of combined heat and power resource adequacy capacity associated with the Los Medanos Energy Center, LLC
- The Alternate Resolution rejects the Confirmation for Resource Adequacy Product and provides guidance to PG&E for potential modifications to the Agreement which the Commission would approve in a subsequent Tier 1 Advice Letter filing and provides additional guidance to PG&E for Combined Heat and Power solicitations in the future.
