I don't even know where FC is, but perhaps this is related to your previous inquiry?

For logging as complete:

Received a phone call from Sunil Shori requesting urgent information regarding a PG&E pipe project taking place in Foster City, it sounded like he was responding to a request for information either internally or externally.

With excellent help and quick response from [Redacted] and [Redacted] I provided the following to Sunil:

An Aldyl-A replacement project began in Foster City this week replacing approximately 6,000 feet of pipe. Three more replacement projects are scheduled in Foster City, two in 2013 of 5,600 feet and 3,000 feet with one more project of approximately 5,100 feet in 2014 which will replace all the Aldyl-A in Foster City.

Sunil also asked about the risk ranking for this pipe, but I indicated I didn't have that information readily available.

Thanks,
