Sid,	
No change at weigh in – zip.	
My daughter visited. I ate more, did not pig out, but no loss.

To: Sullivan, Timothy J. **Subject: 214.2** That's what my scale said this morning. Here's my version of the toy/gadget: http://app.strava.com/activities/55658131 I got a discarded and deactivated phone from my boss last week, and was able to make it work for this Strava thing, which allows me to compete virtually with other cyclists. I think it's terribly cool. By the way, here's the logger, the book, and the calorie counter I like to use: http://www.fourmilab.ch/hackdiet/e4/ Next, the calorie counting tool, with the login: http://caloriecount.about.com/ http://caloriecount.about.com/cc/account/login.php I much prefer the Hackers' Diet weight too to the othersl: https://www.fourmilab.ch/cgi-bin/HackDiet/ Note that I haven't counted calories in a long time, but it totally works.
