

**PACIFIC GAS AND ELECTRIC COMPANY
2014 General Rate Case Phase I
Application 12-11-009
Data Response**

PG&E Data Request No.:	CCSF_003-10		
PG&E File Name:	GRC2014-Ph-I_DR_CCSF_003-Q10		
Request Date:	May 1, 2013	Requester DR No.:	CCSF-PG&E-3
Date Sent:	May 8, 2013	Requesting Party:	City and County of San Francisco
PG&E Witness:	Jeffery Hulon	Requester:	William K. Sanders

QUESTION 10

In PG&E's Response to Question 1.a in the City's First Set of Data Requests, PG&E states that "PG&E has seen improvement in average days to replace burnout bulbs and repair the facilities associated with streetlights from 18 days in 2011 to an average of 6 days currently." With regard to that statement, please provide a copy of any documents or data that supports this statement.

ANSWER 10

The tools utilized to capture streetlight burnout repair metrics have been changed out since 2011, so only nine months of information for 2011 were readily available. For those nine months of 2011, the data shows that the average repair time was 12 days. For 2012 the average repair time was 40 days. Through April 28, the average repair time in 2013 is 6 days. Please see attachments GRC2014-Ph-I_DR_CCSF_003-Q10Atch01 for 2011 data, GRC2014-Ph-I_DR_CCSF_003-Q10Atch02 for 2012 data, and GRC2014-Ph-I_DR_CCSF_003-Q10Atch03 for 2013 data.
