Thanks Meredith for the electronic version of the letter.

1. Could you also send me an electronic copy of the briefing you provided Energy Division on May 20<sup>th</sup>?
2. Could you also send me a copy of any written documentation or reports on the overall status of the 6900 miles of NERC compliance work where you are looking at the status of all of your 200kV+ lines. My understanding is that the 39 miles in Sonoma is just one segment of a much larger project. I'm interested in how much has been done, where it was done, how much it cost, and how much is left to do (and where those left to do parts are located). What GRC budget category is this work being charged to?

Thanks,  
Molly
