Subject: RE: the PG&E Central California Clean Energy Transmission (C3ETP) project.

Mary Jo,

The CAISO declined to approve C3ETP in favor of short-term upgrades to the 230 kV system in the Central Valley. While we still believe that a major 500 kV project in the Central Valley will eventually be needed, and CAISO continues its long-term planning studies, we do not envision being in a position to file a CPCN application for any such project within the next two years.

Thanks,
David

Hi Meredith and David

The contracts office is asking about this project, as we have a contract with an environmental consulting firm to do CEQA on this project. Is the project on hold, or has it died for lack of interest or ????

Please let me know. If you don't plan on resurrecting this in the near term, we will cancel the contract on this and start it up again if it resurfaces.

Thanks

Mary Jo
