	Briefly describe.	Yes/No. describe	Yes/No. describe	Yes/No. describe		Describe and include effective care discount	Quantify total CARE subsidy under proposed end-state rate.	Describe including time frame of transition of each rate design element.	Describe	Describe opt-out rates for both transitional and end-state rates as well as optional rates.	Yes/No Describe
DRA	Cost-based TOU rate with 5 cents/kWh baseline credit	Yes. Baseline allowance: PG&E 55% SCE 53% SDG&E 55%	No. \$5 min bill in lieu of customer charge.	No	Use IOUs' Season/TOU periods	PG&E 35% discount SCE, SDG&E 30% discount*	(Millions) PG&E: \$453 SCE: \$337* SDG&E: \$67	3-tiered structure with summer on-peak surcharge and year-round off-peak credit. T1 up to 100% BL, T2 100-200%, T3 above 200%	For PG&E: The CARE percentage discount will be gradually decreased over the transition period. The implementation year illustrative rate reflects a 43% effective CARE discount.* SCE 30% SDG&E 30%	Durring transition customers can opt out to the same 3-tier non-TOU rate (w/out the on-peak surcharges and off-peak credits). Can opt out of end-state TOU rate to 2-Tier non-TOU rate.	Yes - Modify sections 739.9(a), 739.1(b)(2) and 745(d), with limitations, to allow some flexibility in increasing lower tier rates and adjusting the tier usage definitions.
						*DRA notes that models may not correctly calculate CARE subsidy levels or effective CARE discounts.
