Laura,

This is great! I've been doing some thinking along the same lines. Let's discuss.

Liza

Elizaveta Malashenko

We (me, Jane Yura, Frances Yee, Redacted) had a meeting this morning with Ken Bruno and his team to go over our self-report stats and risk assessment thinking in advance of the August 1 & 2 workshop.

Among other things, we talked about how valuable we think it could be if there were a centralized, safe, central source to collect info that all gas utilities could share. Last year Jane and I went to Sunnyvale to talk with the NASA Ames team that manages the airline reporting system. It's impressive. I think it might be something that the CPUC would want to consider, and of course there are lots of ways that could be done.

Here's some background.

Hope to catch up later this week if you're available.

Ken, Chuck, Paul, Amy –

Attached is a copy of a presentation that was the basis of a discussion with Linda Connell, who heads the Aviation Safety Reporting System for the FAA/NASA Ames. They are located very close to us (Sunnyvale, NASA Ames) and provided us with some great benchmarking information from an industry that is known for assessing risk and improving safety. Fundamentally, we believe self-reporting and broad information sharing is a way to make the industry safer.

You can see that the model is being adopted by others, and NASA Ames is happy to share their approach, provide guidance to those developing reporting systems, or even act as a platform to gather data. Linda travels worldwide to discuss ASRS.

Pls let us know if you need more information,

Thx

Jane

Jane,
You are very welcome. We enjoy visitors wanting to hear about the ASRS national system. We also are looking forward to the Oct 15 meeting.
Attached is the presentation copy that we used for our discussions last week.
Thanks
Linda
