Subject: RE: Rate reform discussion -- application of fixed charge cap to optional rate

schedules

I wouldn't think that limitation is critical and could be part of the IOU proposal when filed.

In the interest of time. . . . we'll need to get this routed to Sac folks tonight with caveats that TURN et al are co-reviewing it but there are no surprises(it's been converted to leg amendment mode). they're already very grumpy at what was supposed to be there on Monday.

We could live with it if you put back the "intended to serve customers with low or moderate demand."

Subject: Rate reform discussion -- application of fixed charge cap to optional rate schedules

IOU folks,

I've just spoken with DRA and we can live with the following revision to the language regarding the application of a fixed charge cap to optional rate schedules:

The CPUC may authorize total residential fixed charges of no greater than \$10 per month for non-CARE customers and \$5 per month for CARE customers. This provision shall apply to any default rate schedule, any flat or tiered rate schedule, and at least one optional time variant rate schedule. intended to serve customers with low or moderate demand.

In case the editing isn't clear in email, here's how the clean version would read:

The CPUC may authorize total residential fixed charges of no greater than \$10 per month for non-CARE customers and \$5 per month for CARE customers. This provision shall apply to any default rate schedule, at least one optional tiered rate schedule, and at least one optional time variant rate schedule.

Does this work for everyone?
