Subject: RE: Rate reform discussion -- application of fixed charge cap to optional rate

schedules

Matt, Mike, Linda,

I think we are – finally – at Yes. We appreciate your working through these issues with us and look forward to working together with you on the next phase of this legislation! I've distributed separately to you draft amends that we think reflect the agreements. Let us know your thoughts on those; I think there are a few folks in Sacramento who would benefit from seeing some version of them very soon....

Whew!

Best -

Trina

Subject: Rate reform discussion -- application of fixed charge cap to optional rate schedules

IOU folks,

I've just spoken with DRA and we can live with the following revision to the language regarding the application of a fixed charge cap to optional rate schedules:

The CPUC may authorize total residential fixed charges of no greater than \$10 per month for non-CARE customers and \$5 per month for CARE customers. This provision shall apply to any default rate schedule, any flat or tiered rate schedule, and at least one optional time variant rate schedule. intended to serve customers with low or moderate demand.

In case the editing isn't clear in email, here's how the clean version would read:

The CPUC may authorize total residential fixed charges of no greater than \$10 per month for non-CARE customers and \$5 per month for CARE customers. This provision shall apply to any default rate schedule, at least one optional tiered rate schedule, and at least one optional time variant rate schedule.

Does this work for everyone?
