My ride this morning was epic suffering in the fog. You would have loved it. Up sutro peak behind UCSF, and up twin peaks from the north and the south. Some pitches over 20% on Sutro, I'd guess. My iPhone was unable to track it – fog inhibitor?

What are you doing for the 4th? My auntie is in town starting tonight. You have any good ideas for a fit 70+ woman from Chicago?
