That's what we're planning to use. Thanks.

Laura and Brian –

Will you all be using the CEC climate zones in answering Marzia? I suggest that we all do so that we can have comparable answers. Does that work for ya'll?

yours,

sid

Marzia –

Here is the residential data broken up both by county and by month for PG&E only. We do not have the county data for the other IOUs. We are working on the income data by county for the PG&E territory and the PG&E-defined climate zone data for you.

yours,

sid

Hello,
That's fine. Late next week works.

Yes, we will work on it. But as you said, I bet this will require a new analysis, and the analysts in question are working from home.

yours,

sid

Sid –

Are you going to ask?

I ask because there are a lot of folks out right now and all my bill people are getting ready for the AB327 hearing tomorrow along with the stuff that's due for Rate Reform OIR.

It doesn't make sense for all of us to be chasing this.

Marzia – I hope this is okay approach. I'm pretty confident we don't have it handy and would need to run some analysis to output this

Hi,

So, I sent the info that Sid gave me which was **average** rate, bill and usage for each State for 2011. However, now one commissioner wants to know if there is data by climate zone and by month for Cali only. Oh, and do you have data average bill as a percentage of average income by county???

Any help?
