Subject: Your call

Hi Erik. I got your voice mail about the proposed reliability framework. I don't really have anything to add to why this is happening other than what is described in the document that was posted on the CAISO web site. The Commissioners' remain concerned about a centralized capacity market and the details of the proposal need to be worked out in a way that addresses that. I cannot speculate on whether that is possible, but this is an effort to work jointly with the CAISO, at least on a staff level.

I hope this helps. Forgive the email rather than a call back. I am on a conference call now and in meetings just about all week! Take care.

Cynthia Walker
