Subject: RE: radon testing?

Hi Red, the inquiry was initiated from Asm. Quirk's office. I don't think it's directly related to the biogas proceeding. I think someone named Robert Nast has been asking anyone who will listen about this, based on some recent reports that gas from the Marcellus shale has elevated levels of radon relative to other sources.

Richard,

If I may be so bold, would it be appropriate to inquire as to which legislator's office contacted the CPUC about radon etc? Do you believe it's connected to the biomethane proceeding? Seems like it might well be.

Subject: radon testing?

Hi Laura and Don: A legislator's office question was forwarded to me. Does PG&E ever test gas injected into the utility system for radon or other naturally occurring radioactive material? I know it's not part of the gas quality specs, but do you ever test for these constituents?

Richard
