Subject: brief update

Fire Dept left at 11:45 am. Things should be returning to normal in the next couple hours.

Ditas

Here's what I know from a supervisor in Sacramento:

It was a third-party (ie., not PG&E) contractor dig-in. 2" distribution pipe. The area had appropriate USA marks, so it appears to have been completely the fault of the contractor.

Gas was shut off at around 11:25 am. 4 news trucks onsite.

This was reported to the CPUC.

Service should be restored this afternoon.

I'll provide more details when I get them.

Regards,

Laura

Ditas,

Laura Doll will look into it and let you know.

Thank you.

Hi Meredith,

I know this isn't your area, but can you have someone update me on the incident at Bear Flag way and J street in Sacramento? It's just down the street from my home.

Thanks,  
Ditas

Hi Ditas,

Diablo produces 18,000 GWh, which is 20% of the power in PG&E's service territory.

Please let me know if you need additional information.

Thanks,

Meredith

Meredith,

Just curious, I know SONGS provides 17% of Southern CAs power, what does Diablo canyon produce for norCa or as a percentage of PGEs

territory etc? Or at least some kind of comparison?
