Subject: RE: Any chance for a meeting late next week or early the following week?

Laura,

Early in September would probably be best. I'm copying Sunil and Mike as well, since this is probably something that would be best addressed by technical experts.

Thanks,

Liza

Liza

You may remember the brief discussion about the need for a code update we had when you visited our office a couple weeks ago. The issue has to do with the code for testing/class location requirements written for grandfathering rules, now being in conflict with new pipeline testing requirements. There is both a need and an opportunity for CA to take the lead on clearing up this safety-related issue and having it improve code throughout the US. We'd like to go over more information we now have about specific locations on our system that need special permits to take the latest testing into account, and we'd like to lay out a proposed approach that would involve a joint application to PHMSA.

We know its a busy time. Just wanted to try to get an hour with you any time after next Thursday. How does your schedule look?

Thanks

Laura and Jane
