Subject: Re: Energy Division Transmission Project Data Request

Hi Meredith – I already got a call from another utility asking for a couple clarifications. One, this request does include substation projects. Two, for the projects that are not filed, think projects that would normally be filed as a PTC or CPCN, but are exempt, per the GO. We are not looking for every little circuit breaker replacement, just looking for a good sample of larger projects that we may not see filed.

Thanks,

Amy

**Subject:** Energy Division Transmission Project Data Request

Please find attached a data request from Energy Division on transmission projects. The instructions and deadline for the data request are included in the Excel file. If you have any questions, please contact me.
