Subject: rate increases

To Whom It May Concern:

I am writing this letter in protest of your proposed rate increases. During the worst economic times in the history of our country, this would be another nail in the coffin!

The state of California is in turmoil, spending is out of control and we don't yet know what new fees and taxes will be forced upon us, by our *Great Leaders?* We run a small business that employs 10 full time positions and up to 25 seasonal employees and we are just trying to survive.

Please take these factors into consideration and deny any of these rate increases.

Sincerely,

Redacted
