An Open Letter of Protest to the California Public Utilities Commission:

It has come to our attention that the California Public Utilities Commission (CPUC) and the Federal Energy Regulatory Commission (FERC) decided to increase electric revenue requirements, impacting electric rates effective March 1, 2009.

Businesses and consumers in California already pay some of the highest electric rates in the country, and we feel that any increase at this time of economic turmoil would place an undue hardship on our business and our employees.

We hope the CPUC will take a hard look at this issue before implementing any additional rate increases during this economic crisis.

Sincerely,
