Subject: RE: HAN for net metered customers

Kimberly,  
Thank you very much, this is very helpful. I look forward to our next discussion.  
Best,  
Dave

Hi David,

Good talking with you earlier this week. Here's a high level snapshot of our architecture, per that discussion – let me know any questions. We can also talk in more detail about our DR strategy beyond thermostats when we meet next Thursday.

Thanks and have a great weekend!

Kimberly

Thanks for sharing. Yes, both SDG&E and SCE have Itron meters.

Thanks,

Amy,

Thought you might be interested in this response from SDG&E. I'm not sure who their meter/NIC interface vendor is, but I seem to recall that it is not Silver Spring Networks/L&G/GE. I'm confirming that.

Dave

Hi Dave,

Net Metered customers **can** connect an SDG&E validated device to their meter. Please see our website for the validated devices: [www.sdge.com/han](http://www.sdge.com/han)

Please note that the energy consumption displayed on the in-home displays will be the net value between what is produced by their solar system and what is used in the home.

Any more questions, please just let me know. Thanks,

Megan

Hi Megan,

Would you be able to find out if SDG&E is registering net metered/PV customers in the HAN program?

Thanks,

Dave
