Alin-

We are going to be bringing line L-114_2 into service tomorrow 10/18. Per our directions from SED I am reaching out to coordinate your presence. Field safety meetings will begin around 7:00am. Soap testing will not begin until line has reaches 100PSIG and we have removed the plates from the streets. Plates cannot be removed until 8:30am and I don't know if line pressure will be reached by this time. Please feel call [Redacted] or myself to find the work execution plan in the morning.
