CPUC Issues Staff Paper on Utility Investment Valuation Strategies: CPUC Information Alert

The California Public Utilities Commission's Policy and Planning Division today issued a paper titled, "Utility Investment Valuation Strategies:

A Case for Adopting Real Options Valuation".

The paper takes a deeper look into how utilities make investment decisions, and recommends that

utilities and regulators should consider new types of investment valuation strategies for maintenance and upgrade projects in electric and water utilities. The paper argues that the conventional way of valuing Maintain Repair and Upgrade investments implicitly undervalues them by not recognizing the value of new information and the value of managerial flexibility to react to that information.

The paper is available at <http://www.cpuc.ca.gov/NR/ronlyres/D5C63A2B-40F2-468D-964A-F265B90346B1/0/Final2RRM.pdf>.

Please let me know if you have any questions.
