Subject: FW: Decision on Raising Gas Pressure

Here is the decision I referenced. Perhaps we can re-certify the verification process for Line 147 (like we would do when we place a new line in operation). Laura has an idea. Call her.

It was specific lines resulting from a Clanon letter (overpressurizations). There are 10-15 lines that would go through this process. Here is the link:

Shilpa – recall the original decision hat told us how we need to seek authority on raising gas pressures. Was it relegated to the specific lines we took down or to all pressure reductions ?
