Here is one thought. Redding is primarily served through a POU.

Brian,

The CPUC could visit the Pit 7 powerhouse, which is one hour away from Redding. Redding Electric Utility provides electric service in that area. We only provide gas.

Erik can track down more details on Pit 7 if there is interest.

Thanks,

Meredith

Subject: tours in Redding

Brian,

On some of these road show hearings we arrange tours of interesting energy related facilities for advisors and directors the day before. Is there anything PG&E can think of, that would be worth a tour while we are in the Redding area? Examples from the past are UCSD's micro grid and a tour of Fresno's wastewater treatment plant (which was actually very interesting).
