## CLEAN COALITION MOTION FOR PARTY STATUS IN R. 13-09-011

Pursuant to the Commission Rules 1.4 and 11.1 of Practice and Procedure, the Clean Coalition respectfully requests party status in R. 13-09-011.

The Clean Coalition is a California-based nonprofit organization whose mission is to accelerate the transition to local energy systems through innovative policies and programs that deliver cost-effective renewable energy, strengthen local economies, foster environmental sustainability, and enhance energy security. To achieve this mission, the Clean Coalition promotes proven best practices, including the vigorous expansion of Wholesale Distributed Generation (WDG) connected to the distribution grid and serving local load. The Clean Coalition drives policy innovation to remove major barriers to the procurement, interconnection, and financing of WDG projects and supports complementary Intelligent Grid (IG) market solutions such as demand response, energy storage, forecasting, and communications. The Clean Coalition is active in numerous proceedings before the California Public Utilities Commission and other state and federal agencies throughout the United States, in addition to work in the design and implementation of WDG and IG programs for local utilities and governments. The Clean Coalition has intervened before the Commission on many areas surrounding including Long Term Procurement Planning (LTPP), Resource Adequacy (RA), Energy Storage (ES) and various Smart Grid proceedings.

The Clean Coalition has identified demand response (DR) as a key solution for integrating high levels of distributed renewable generation (DG) in a cost-effective way. We are uniquely focused on how DR, and especially Local Automated DR, can play a significant role in integrating centralized and distributed renewables by shifting consumer electricity usage away from peak periods and providing grid services. The Clean Coalition has been active before the California Independent System Operator and the California Energy Commission on issues surrounding the expansion of DR and we

plan to continue our involvement with the California Public Utilities Commission in this proceeding moving forward.

Services of notices, orders and other communications and correspondence in the proceeding should be directed to the Clean Coalition lead for this proceeding, Dyana Delfin-Polk. The Clean Coalition also requests that the official service list include Stephanie Wang with contact information as set forth below:

Participation by the Clean Coalition in this proceeding will not prejudice any party and will not delay the schedule or broaden the scope of the issues in this proceeding. For the reasons stated above, the Clean Coalition respectfully requests that the Commission grant this Motion Requesting Party Status.

Respectfully submitted:

/s/Dyana Delfin Polk
