Subject: FW: correction of errors

Sid: Here are the proposed edits.

-

Correction on page 31:

The 70%/30% ratio of EE measures and non-EE measures also applies to financing which does not rely on ratepayer-funded CEs (e.g., OBR for medium and large businesses). However, as set forth in §5.5, a wider range of eligible projects (e.g., demand response, distributed generation) may be included in the ~~70~~ **30%** non-eligible EE measures for those pilots.

Correction on page 65:

Therefore, it is reasonable for the Commission to authorize the implementation of the OBR for Non-Residential Customers without CE pilot program as described above. Eligible financing shall include a 70%/30% ratio of EE projects, but the ~~70%~~ **30%** may include DR and DG.
