Subject: [Redacted] Power Plant Incident - June 2012

Redacted

In winding down our investigation of the June 2012 fatality at Kern, I'd like PG&E to provide the following:

1. Documents that seek, solicit and otherwise request proposals, scope of work or other response to conduct a Root Cause Analysis of the June 2012 Kern Incident, including but not limited to description, scope, requirements, expectations, limitations and other parameters regarding the content of the anticipated Proposal(s) and deliverable Product(s).
2. The Proposals mentioned in *Root Cause Analysis of Fatal Injury at Kern Power Plant - Bureau Veritas Project Number: 33112-012262.00*, dated February 6, 2013, and all other proposals and scope of work prepared for the Kern RCA project.
3. Contracts, agreements or other documents to retain or otherwise engage Bureau Veritas.

I highlighted two Bureau Veritas proposals identified in the RCA's Introduction: No. 3303.12.365 and No. 3303.12.776, below.

I would like to receive PG&E's response by **October 31, 2013**. Please feel to contact me or Rick Tse (rkt@cpuc.ca.gov, 415-355-5581). Thanks in advance; I appreciate PG&E's cooperation.

1.0 INTRODUCTION

Ms. Alicia Fenrick, Director, Litigation and Claims, with Pacific Gas and Electric Company (PGE), retained Bureau

Veritas North America, Inc. (Bureau Veritas) to conduct a root cause analysis (RCA) of the fatal accident at the

Kern Power Plant located at Redacted in order to assess potential

improvements in PGE's relevant (contractor) safety management systems in place at the time of the accident. The

scope of work for this project was described in **Bureau Veritas' Proposal No. 3303.12.365 dated November 5, 2012,**

and Proposal No. 3303.12.776 dated December 18, 2012 both addressed to Ms. Alicia Fenrick. The project was

completed in accordance with the Master Services Agreement (MSA # 4400005800, effective 2-2-12) established

between BVNA and Pacific Gas and Electric. While on-site at KPP Mr. William Hicks was Bureau Veritas' primary

contact.
