Attachment to complaint dated: September 5, 2013

Contractor Name: Cozart Brothers, Inc.

11. Items of Complaint

On 7/12/2013 at 9:55 am, an employee of Cozart Brothers, Inc. severed a PG&E-owned 2" plastic gas pipeline with a tractor grader blade while lot grading on the property of the [Redacted], near [Redacted], Pittsburg, CA. PG&E investigation showed that the contractor (Cozart Brothers, Inc.) had exposed (brought to the surface), and left lying on the ground, approximate 75' of this active 2" gas line, and had done this without the knowledge of PG&E. PG&E also verified that Steve Cozart, a project foreman of Cozart Brothers, Inc. was the damaging party.

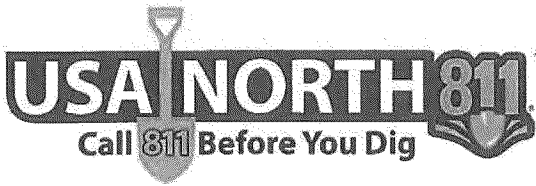

The act of exposing this gas line without PG&E knowledge, and failing to properly protect this line from being damaged, created a markedly dangerous situation for the workers present, as well as the neighboring community. Additionally, the contractor failed to call for a USA ticket prior to this work and follow other safe excavation practices. We believe the contractor violated the requirements set forth in California Code 4216, as well as the requirements identified in CalOSHA Title 8, Chapter 4, Subchapter 4, Article 6, Section 1541.

Enclosed you will find some photographs of the line the contractor exposed without PG&E knowledge.

History:

- Hit on 1/22/2007 - No USA
- Hit on 5/18/2007 - With USA - Contractor hit 2" gas main while grading for new tract. The facilities were accurately marked, but the contractor failed to exercise safe excavation practices by hand digging within 24" on either side of the outside edge of the underground facility (tolerance zone).
