Subject: RE: Data on 2012 opt -in ptr vs SR

Dude. I'm a zombie today. Had a greasy breakfast at the PUC. That didn't help much...

Total of seven attachments received in two e-mails. Is that it?

Michael –

These attachments are all about the three IOUs' peak-shaving programs, and are supposed to illustrate that our SmartRate is an effective program. In fact, I think it is effective enough that it doesn't make sense to start from scratch with either a default PTR **or** an opt-in PTR. Of course, this is only one of many things that have changed since the record was closed in this case.

The results that are cited in our summary are from 2012. 2013 results won't be available for months. Note that SmartRate enrollment has grown a lot since 2012, and now stands at something above 118,000. We should talk about how we were able to get to that enrollment in a separate conversation some time.

So, first open the PPTX attachment, which is PG&E's summary of results from the programs (defined more carefully in the notes). In it, you will find citations to the three ex-post reports from the IOUs done by FSC, a third party. I've included these three reports for your convenience, but they were also submitted to ED. If you would like a bit of help walking through it, like I did, please give me a call.

yours,

sid

Sid,

The deck has been double-checked and updated to include all three IOU's residential peak shaving program, plus those customers that also participant each IOU's AC cycling program.

Enrollments in California's Peak Shaving Programs

	<u>PG&E</u>	<u>SCE</u>	<u>SDG&E</u>
<u>Peak Shaving Program Name</u>	SmartRate™	Save Power Day	Reduce Your Use
Program Type	Critical Peak Pricing	Peak Time Rebate	Peak Time Rebate
Avg. Enrollment (Opt-In)	38,667	117,942	41,243
<u>AC Cycling Program Name</u>	SmartAC™	Summer Discount Program	Summer Saver
Avg. Enrollment (dually participating)	22,132	28,111	2,917
<u>Total Avg. Enrollment*</u>	<u>60,799</u>	146,052	44,160

**Total enrollments my not sum due to averaging*

	<u>PG&E^A</u>	<u>SCE^B</u>	<u>SDG&E^C</u>
	SmartRate™	PTR	PTR
Avg. Opt-In Customer Reduction (kW)	0.280	0.097	0.083
Avg. Opt-In Customer % Reduction	18.0%	4.3%	6.4%
Avg. Opt-In Aggregate Load Impacts (MW)	17.1	14.1	3.7
Avg. Opt-In Customer Count for Season	60,799	146,052	44,160

The attachments include the following:

1. Deck summarizing California's 2012 Dynamic Pricing Program Ex Post Load Impacts
2. PG&E's 2012 SmartRate (CPP) Load Impact Evaluation report
3. PG&E's 2012 Ex Post Load Impact Table generator
4. SCE's 2012 Save Power Day (PTR) Load Impact Evaluation report
5. SCE's 2012 Ex Post Load Impact Table generator
6. SDG&E's 2012 Reduce Your Use (PTR) Load Impact Evaluation report

7. SDG&E's 2012 Ex Post Load Impact Table generator

Call me on my mobile if you have any questions.

Thanks,
