ENCLOSURES:

The following enclosures were used to establish the findings of fact:

1. Enclosure 1: "Letter of Concern"

SED staff investigation is ongoing. Some of the information used to establish findings of fact is confidential.

STATEMENT OF FACTS:

The above violation(s) are based on one or more of the following:

- On March 26, 2013, Pacific Gas and Electric (PG&E) employee observed a PG&E contractor perform a nondestructive test in a manner non-compliant with applicable codes and standards.
- 2. The observation of the non-compliant nondestructive testing occurred on a project in Brentwood on Line 114.
- On April 1, 2013, PG&E sent a letter to the company contracted to perform nondestructive examination, notifying them that all further work by the contractor has been terminated.
- Subsequently, PG&E re-validated all welds on Line 114 to ensure their safety.
 This PG&E work has been reviewed by SED and SED currently has no outstanding concerns.
- In the immediate aftermath of observations made on March 26, 2013, PG&E
 began an extensive review of other work performed by the nondestructive testing
 contractor.
- PG&E review of contractor's previous work identified 224 nondestructive tests
 that were not in compliance with applicable codes and standards. Specifically, the
 welds had incomplete radiographic coverage which did not cover the entire
 circumference of the weld.
