Subject: FW: CPUC hydrotest ruptures and fracture mechanics

Liza,

We're ready to start the analysis on 3 hydro-test ruptures (analysis by Exponent) – to determine the cause of the ruptures and the metallurgic analysis.

1. Line 1615-01
2. Line 300 A-B cross-tie
3. Line 142N

We have told Exponent not to start until SED has confirmed their attendance for the tests.

I don't have the name(s) of the SED staff that is participating, but could you see if they could set some dates as soon as possible ---- the sooner we learn about these failures, we can incorporate the findings into our program.

Thank you and have a great weekend,

Jane
