Advice 4322-E (Pacific Gas and Electric Company ID U 39 E)

Public Utilities Commission of the State of California

Subject: Modifications Electric Rate Schedules NEM. NEMV and to NEMVMASH, to Preliminary CP, Electric Statement and Establishment of a New Electric Sample Form, to Implement Renewable Energy Credits Compensation Pursuant to Decision 11-06-016

Purpose

Pacific Gas and Electric Company(PG&E) hereby seeks approval for modifications to its tariffs in accordance with Ordering Paragraph (OP) 2 of Decision (D.) ¹1-06-016, which ordered PG&Eto include a renewable attribute adder (RAA) to the net surplus compensation rate. The affected tariff sheets are listed on the enclosed Attachment 1.

Background

(AB) 920 (Chapter 376, Statutes of 2009) amended Public In 2009, Assembly Bill Code Section 2827 and required electric utilities to develop a tariff Utilities mea providing "net surplus compensation" to their net energy metering customers who export more energy (kilowatt-hour or kWh) than they purchase from the utility over the course of a true-up year. Applications were filed by the utilities, including PG&E, to Commission (CPUC), which were combined into a single Public Utilities California On June 9, 2012, the CPUCissued D. 11-06-016 that Application (A) 10-03-017. directed the utilities to revise their net energy metering tariffs. OP 2 states the following:

Pacific Gas and Electric Company,Southern California Edison Company,and San Diego Gas & Electric Companyshall each include a renewable attribute adder to the net surplus compensation rate in Ordering Paragraph 1 ab<u>ove, after</u> the <u>California Energy Commission determines the eligibility of net energy</u> metering <u>customer facilities for the Renewable Portfolio Standard and an ownership</u>

¹ D. 11-06-016 Decision Adopting Net Surplus CompensationRate Pursuant To Assembly Bill 920 And The Public Utility Regulatory Policies Act Of 1978 http://docs.cpuc.ca.gov/PublishedDocs/WORD_PDF/FINAL_DECISION/137431.PDF

<u>verification</u> and tracking system for Renewable Energy Credits created by net <u>surplus generators</u>. The renewable attribute adder shall be calculated using the most recent Western Electricity Coordinating Council average renewable premium, based on United States Department of Energy published data. The renewable attribute adder shall only be paid to those net surplus generators who provide Renewable Energy Credits to the utility. (underlined emphasis added)

PG&Esubmits this advice letter based on the provisions included in the California Energy Commission(CEC) RenewablesPortfolio Standard (RPS) Eligibility Guidébook issued on April 30, 2013, which confirmed the guidelines of net energy metered customer facilities for both RPSeligibility and for the ownership, verification and trac of Renewable Energy Credits (RECs) created by net surplus generators.

Consistent with the requirements in D.11-06-016, OP9, retroactive payments may or may not be provided.

Renewable Attribute Adder

Ordering paragraph 2 of D.11-06-016 requires that the RAA to the net surplus compensation rate be calculated using the most recent Western Electricity Coordinating Council (WECC)average renewable premium, based on United States Department of Energy (DOE) published data. PG&Esubmits an annual advice letter on October 1 each year that includes the RAAdata as defined in D.11-06-016. The October 1 advice letter is submitted in compliance with Resolution E-4475 and D.11-12-018 and supports the market price benchmark used in PG&E's annual Energy Resource Recovery Account (ERRA) Forecast³. PG&E's2013 Advice Letter 4296-Eincludes the most recent WEC(RAAdata, reproduced here as Appendix A, from the DOEwebsite that publishes survey results of Western US renewable energy premitams AL 4296-E, PG&E'scalculated average price for states in the WECQs 16.45 dollars / megawatthour or 1.645 cents / kWh.

⁴ Advice Letter 4296-E can be found at:

² The RenewablesPortfolio Standard (RPS) Eligibility Guidebook (Seventh Edition), publication # CEC-300-2012-005-ED7-CM adopted April 30, 2013. And posted May 17, 2013 is available at: http://www.energy.ca.gov/renewables/documents/#rps

The Sixth Edition of the RPSHandbookissued on August 29, 2012 established guidelines for net energy metering customers, however PG&Esought revisions to provide a simpler process for net energy metering participants. These revisions were not adopted by the CEC.

³ The compliance advice letter required by Resolution E-4475 and D.11-12-018 was an outcome of Rulemaking 07-05-025 for the Direct Access reopening.

Tariff Revisions

1. Electric Schedules NEM, NEMV, and NEMVMASH

The following modifications to the Special Condition covering Net Surplus Electricity Compensation (NSC) in Rate Schedules NEM, NEMV and NEMVMASH were made:

- PG&Emodifies the first paragraph and adds several new paragraphs, (i) citing the CPUCdecision and CECbasis for the program, (ii) referencing the CEC guidebook, (iii) listing the three requirements for a customer to be eligible mentioned below on the form and (iv) providing a description of how the RAAis calculated.
- 2) A reference to the new Filed Form 79-1155 with PG& Energy Credits NEMV, NEMVMASNet Surplus Electricity (NSE) RenewableEnergy Credits Compensation Form is included in the NEM, NEMV and NEMVMASH tariffs.
- 2. New Form 79-1155 to Obtain RAA Compensation

In order to receive any REC compensation owed, a customer will need to complete, sign and return Form 79-1155 -Schedules NEM, NEMV, NEMVMASHNet Surplus Electricity (NSE) Renewable Energy Credits Compensation Form. This form requires that the net energy metering customer:

- i) Certify ownership of the net surplus electricity RECs. In certain cases wh the customer has generator leasing arrangements or power purchase agreements, it is not unusual for the third party to retain ownership of th RECs;
- ii) Certify the Renewable Portfolio Standard (RPS) eligibility of the net energy metering generating facility that created the RECs. PG&Ewill require that a copy of the CECRPSeligibility certificate for this facility be attached with form, until such time as this facility's RPS eligibility certification state available to PG&E from another source.
- iii) Transfer Western Renewable Energy Generation Information System (WREGIS) Certificates representing the Renewable Energy Credits to PG&E's WREGIS account.

If the customer is using a RECaggregator, PG&Ewould also need details about the WREGIScertificates, including the number of certificates, the WREGIS Generating Unit ID, CECRPSID, the period covered by the certificates, and the associated certificate serial numbers for verification purposes.

3. Preliminary Statement

In order to track the payments for RECs, PG&Ealso makes modifications to Preliminary Statement CP. In 2011 PG&Esubmitted advice letter Electric AL modify the ERRA Electric Preliminary Statement ("Preliminary 3909-E to all related Net Surplus Statement") to recover revenues or costs to Compensation (NSC) for Eligible Net Energy Metering Customers, pursuant to Decision ("D.") 11-06-016 and CPUC Resolution E-4422.

In advice letter 3909-Effective March 24, 2011, PG&Eproposed updates to its Energy Resource Recovery Account ("ERRA") Electric Preliminary Statement to recover all revenues or costs related to Net Surplus Compensation (NSC) for Net Energy Metering Customers. In 3909-E, PG&Estated, "Pursuant to Eligible D.11-06-016, NSCpayments may eventually include additional compensation for PG&Emayre-submit another advice letter once the details renewable attributes. of the additional renewable attribute compensation become available." In this PG&Enow includes modifications statement to advice letter. to its preliminary address the accounting procedure for payments of these renewable attributes.

Payments provided to eligible net energy metering customers for the renewable attributes of net surplus electricity will be recorded as purchased power costs Along with payment for NSC, PG&Eproposes to record the amount of the renewable attributes payments in its existing ERRA.In this advice letter, PG& proposes to include a debit entry to record payments made to NEMcustomers for the renewable attributes for their net surplus energy. Electric Prelimina Statement Part CP, Section 5, is modified to insert new language (in italics):

ad) A debit entry equal to power purchase payments provided to eligible Net Energy Metering customers for energy produced by on-site generation in excess of consumption over a 12-month periodPower purchase payments may include additional compensation for renewable attributes where applicable.

Protests

Anyone wishing to protest this filing may do so by letter sent via U.S. mail, by facsin or electronically, any of which must be received no later than December16, 2013, which is 20 days after the date of this filing. Protests should be mailed to:

⁶ AL 3909-E can be found at: http://www.pge.com/nots/rates/tariffs/tm2/pdf/ELEC_3909-E.pdf

CPUC Energy Division ED Tariff Unit 505 Van Ness Avenue, 4th Floor San Francisco, California 94102

Facsimile: (415) 703-2200 E-mail: EDTariffUnit@cpuc.ca.gov

Copies of protests also should be mailed to the attention of the Director, Energi Division, Room 4004, at the address shown above.

The protest shall also be sent to PG&Eeither via E-mail, or U.S. mail (and by facsimile if possible) at the address shown below on the same date it is mailed or delivered to the Commission

Brian K. Cherry Vice President, Regulatory Relations Pacific Gas and Electric Company 77 Beale Street, Mail Code B10C P.O. Box 770000 San Francisco, California 94177

Facsimile: (415) 973-7226 E-mail: PGETariffs@pge.com

Any person (including individuals, groups, or organizations) may protest or respond to an advice letter. (General Order 96-B, Rule 7.4.) The protest shall contain the followin information: specification of the advice letter protested; grounds for the protesupporting factual information or legal argument; name, telephone number, postal address, and (where appropriate) e-mail address of the protestant; and statement that the protest was sent to the utility no later than the day on which the protest w submitted to the reviewing Industry Division (General Order 96-B, Rule 3.11).

Effective Date

PG&Erequests that this Tier 2 advice filing become effective on January 25, 2014, which is 60 calendar days after the date of filing.

Notice

In accordance with General Order 96-B, Section IV, a copy of this advice letter is beir sent electronically and via U.S. mail to parties shown on the attached list and the part on the service list for Rulemaking (R.) 10-05-004 and R. 12-11-005. Address changes to the General Order 96-B service list should be directed to PG&Eat email address PGETariffs@pge.com. For changes to any other service list, please contact the Commission's Process Office at (415) 703-2021 or at Process_Office@cpuc.ca.gov.

Send all electronic approvals to PGETariffs@pge.com. Advice letter filings can also be accessed electronically at: http://www.pge.com/tariffs

SPECIAL CONDITIONS: (Cont'd.)

NETSURPLUELECTRICITYCOMPENSATIONSC) (Cont'd.): 5. The RAAwill be calculated using the most recent Weste(Nh) (C) (Cont'd.) Coordinating Council (WECC) average renewable premium, Electricity based on United States Department of Energy (DOE) published data I. as submitted via advice letter annually in compliance with Resolution1 E-4475 and Decision 11-12-018. (N) Calculation of the NSC- NSCis calculated by multiplying any Net(L) (d) Surplus Electricity (kWh) by the NSCRate in (b) and (c) above. (T)/(L)(e) Options for receiving NSC- A NEM/Qualified Customer with NSC will automatically have their NSCapplied to any amounts owed to PG&Eand then may choose to: (1) take no action and roll any remaining NSCamounts forward to offset subsequent PG&Echarges; or (2) request that PG&Essue a check if the NSCremaining amount is greater than one dollar (\$1). A Qualified Customer can select this option by calling PG&E,If the Qualified Customeris closing all their accounts with PG&E,PG&Ewill automatically send a check; or. elect not to receive any NSCby completing and submitting form (3) 79-1130 (Customer Request Form not to Receive Net Surplus Compensation) to PG&Eo confirm that they do not want to participate. In this case PG&Ewill zero out any NSCthe NEMV Qualified Customer maybe otherwise eligible to receive. QFStatus - Qualified Customers receiving net surplus compensation (f) must first demonstrate to PG&Ehat the Generator Account from which they receive their generation allocation as described in Special Condition 2(b) are Qualifying Facilities in order to receive NSC. Since the Generator Accounts serving all NEM/Qualified Customers currently meet the requirements for a qualifying facility exempt from certification filing at the Federal Energy Regulatory Commission (FERC), no further documentation is required at this time. (g) Generator Size - Nothing in this Special Condition alters the existing NEM\system sizing requirement. Specifically, in order to be eligible for NSC, the Generator Account system must be intended primarily to offset part or all of the Benefitting Account Qualified Customers' own electrical requirements. Systems that are sized larger than the electrical requirements are not eligible for NEMvand therefore, are not eligible for NSCeither. (Continued)

Net Surplus Electricity (NSE) Renewable Energy Credits (RECs) Compensation Form

Customer or Entity Authorized to Aggregate RECs on the Customer's behalf:

To request Renewable Energy Credit (REC) compensation for Net Surplus Electricity (NSE)¹ produced by the customer's renewable energy generating facility, please complete the following sections:

Section 1 – Customer Information

Please provide the following information for the account associated with the generating facility for which RECs are being transferred to PG&E:

	Last Name or Con	npany Name		First Name		
Customer						
	Number, Street and Unit					
Address						
	City	State	Zip Code			
Phone	Area Code		Number			
FIIOIIE						
Email Address						
Account Information	Account ID			Service ID		
Meter Number (Badge)						

Section 2 – Aggregator Information (if applicable) If the customer's RECs (WREGIS Certificates) corresponding to the NSE are provided by an aggregator authorized by the customer, please provide the following: Aggregator Name (As recorded in WREGIS) Aggregator's WREGIS ID (Generating Unit Aggregator Account Holder ID) Phone Email Address

¹ Net Surplus Electricity (NSE) as defined in the NEM, NEMV or NEMVMASH Rate Schedule under which the customer takes service.

The customer has provided "<u>Net Surplus Electricity</u>" (NSE, as defined in the NEM, NEMV or NEMVMASH Rate Schedule under which the customer takes service), which is reflected on the customer's true-up bill, and for that NSE the customer wishes to receive REC compensation (as described in subsection (c) of the *Net Surplus Electricity Compensation (NSC)* Special Condition in the NEM, NEMV or NEMVMASH rate schedule under which the customer takes service), and the customer or aggregator confirm all of the following:

CERTIFICATION OF OWNERSHIP OF NSE RENEWABLE ENERGY CREDITS:

The customer or aggregator certifies under penalty of perjury that the customer owns the Renewable Energy Credits associated with NSE from the NEM, NEMV, or NEMVMASH generating facility.

RPS ELIGIBLITY OF FACILITY:

 \square

The customer or aggregator certifies that the NEM, NEMV or NEMVMASH generating facility providing NSE to the service account identified in Section 1 is certified by the California Energy Commission (CEC) as a Renewable Portfolio Standard (RPS) Eligible Generating Facility, having the CEC RPS ID listed in Section 4.

PG&E will require that a copy of the CEC RPS eligibility certificate for this facility be attached with this form, until such time as this facility's RPS eligibility certification status is available to PG&E from another source.

TRANSFER OF WREGIS CERTIFICATES TO PG&E:

The customer or authorized aggregator has transferred to the Western Renewable Energy Generation Information System (WREGIS) account of PG&E (WREGIS account number 41) the WREGIS Certificates representing the Renewable Energy Credits which are defined according to the California Renewables Portfolio Standard, as may be amended, and are associated with the NSE provided as shown on the customer's bill statement at the end of the time period(s) listed in Section 4.

For authorized aggregator:

All WREGIS Certificates for accounts that are aggregated must be associated with the customer's <u>PG&E_NEM</u>, NEMV, or NEMVMASH account.

WREGIS only creates WREGIS Certificates in whole megawatt-hour amounts, therefore only whole WREGIS Certificate amounts can be transferred to PG&E. If, however, the WREGIS Certificates were provided from an Aggregator, the allocation for a given customer may include a fraction of a megawatt-hour.

Page 2 of 3 Form 79-1155 Advice 4322-E November 2013

Section 4 – WREGIS Certificates Compensation:

For the NSE generating facility associated with the customer's NEM, NEMV or NEMVMASH account identified by the Account ID and Service ID listed in Section 1, the customer or the authorized aggregator has received and transferred to PG&E:

		g Unit ID:	

CEC RPS ID:

Please attach additional pages to this form as necessary for multiple serial numbers

Serial Number	For Period Beginning (xx/xx/xxxx)	For Period Ending (xx/xx/xxxx)	MWh

PLEASE NOTE: A WREGIS Certificate consists of one megawatt-hour of generation; fractional WREGIS Certificates cannot be created, hence credit for a fractional portion of a WREGIS Certificates cannot be provided unless a customer works through an Aggregator.

Section 6 – Customer Signature

The customer or authorized aggregator attests that the information above is true and correct.

Signature
