Subject: useful calculator

You probably know all this. But I never paid attention before.

Contributing 3% of my pre-tax salary per year will get me to a place where I can expect between \$1200 and \$1800 per month in disbursements (in today's dollars), starting at age 55. That almost gets me to \$10K per month after you figure in my state pension of \$7500 per month (again, in today's dollars).

All this at age 55? It isn't going to buy me a lear jet, but I could ride a craigslist bike quite happily!

You must be looking pretty good with all the grain you've been squirrelling away.

MC

PS: I got an email back from the HR person at my former employer in VA. She said, send me the form ... no problem! Free at last!!
