Subject: PG&E Request for PHMSA Interpretation 192.611

Dear Mr. Gale,

PG&E requests an interpretation of Title 49 CFR Part 192.611 to establish the maximum allowable operating pressure for gas pipelines that have had a class location change.

Our regulator, the California Public Utilities Commission Safety and Enforcement Division has requested that we contact the PHMSA directly for an interpretation.

Please find attached, our letter requesting PHMSA's guidance, and earlier letters with supporting information sent to our regulator.

Thank you for your assistance,

Jane Yura
