Subject: RE: Wireless network in San Francisco is down

I am glad they will work closely with Comcast, and that they didn't ask everyone to stay late in case they came after 500p.

Subject: Wireless network in San Francisco is down

Good afternoon,

The Comcast line that supports our wireless network in the San Francisco (505 Van Ness) building is not functioning. We have reported the issue to Comcast and a technician has been dispatched. Their lead time is anywhere from 3pm- 6 pm today.

We will work closely with Comcast once they are on site and provide more updates as we have them.

Thank you for your patience.
